Professional Summary

- Around 5 years in Software Engineering with expertise in Asp.Net Core, API, MVC, Microservices, DDD, Azure, Angular, and MS SQL Server.
- Managed end-to-end Software Development Life Cycle, ensuring high-quality solutions, precise configurations, and seamless validations.
- Designed intuitive UI, implemented effective validations, and utilized Third-party APIs for dynamic charts.
- Prepared detailed project documentation, maintained robustness through rigorous Unit Testing and Integration Testing.
- Proficient in Microservice, CQRS and Domain Driven Development (DDD) methodologies ensuring robust and effective software solutions.

Projects:

Upstream: Chevron [Feb 2026 - Present]

- Functional Field: Oil & Gas
- Role: Integration Software Engineer
- Software Methodology: Agile
- Tech: ASP.Net Core, Azure, EF Core, SQL Server, Angular, JavaScript, REST
- Description: Developed and maintained integration services for Chevron's Health, Safety & Environment ecosystem, connecting multiple business applications through APIs and event-driven messaging. Enhanced system reliability, data consistency, and real-time reporting capabilities while supporting critical safety and compliance workflows across global operations.

New Small Commercial: USI [Oct 2024 – Jan 2026]

- Functional Field: Brokerage
- Role: Full Stack Developer
- Software Methodology: Agile
- Tech: ASP.Net Core, MVC, EF Core, SQL Server, Angular, Azure, JavaScript, REST
- Description: Developed a brokerage management platform for USI, a leading firm in insurance, consulting, and risk management services. The platform streamlines insurance operations, enabling brokers to manage policies, submissions, and risk assessments efficiently. This involves in optimizing database interactions, enhancing the user interface, and ensuring seamless integration between frontend and backend components by implementing best practices in security, performance, and maintainability.

UWWB Phase-I&II: Beazley [May 2023 - Sep 2024]

- Functional Field: Insurance
- Role: .Net Developer
- Software Methodology: Agile
- Tech: Event-Driven Microservices Architecture, ASP.NET Core, Dot Net Core API, CQRS, Elasticsearch, Kafka, SignalR, Docker, TDD, SpecFlow, Swagger, Postman, REST, LINQ
- Description: Developed a scalable underwriting platform to streamline risk assessment and decision-making processes for the insurance domain. The solution integrated real-time data processing using Kafka and SignalR, enabling seamless collaboration and fast responses to underwriting requests.

Professional Experience

Capgemini: Jan 2022 – Jan 2026

Wipro : Feb 2026 - Present

Technical Proficiency

Languages

C#, SQL, LINQ, JavaScript (ES6+),
Type script, jQuery, HTML, CSS

Frameworks

ASP.NET, ASP.NET MVC, ASP.NET
Core, Entity Framework, Angular

Tools and Technologies

Microsoft Azure, Visual Studio, NUnit,
XUnit, Jira, Git, JSON, SSMS(2012),
Confluence.

Certifications

- Microsoft Certified Azure AI Fundamentals (AI-900).
- GitHub Foundation (GH-900)
- Microsoft Azure Fundamentals (AZ-900)
- Microsoft Certified Azure Developer Associate (AZ-204)
- Microsoft Certified Azure Administrator Associate (AZ-104)

Key Achievements

- **Rising Star & Performance Driver**
Award from the Business Unit, highlighting collaborative efforts and leadership skills.

Education

B.Tech (ECE) – Jawaharlal Nehru
Technological University Kakinada – 2020

TH SWE CLAN Core: RSA [May 2022 - April 2023]

- Functional Field: Insurance
- Role: .Net Developer
- Software Methodology: Agile
- Tech: Microservices, ASP.NET Core, Dot Net Core API, CQRS, Kafka, Docker, SQL Server, TDD, Swagger, Postman, REST, JSON, Linq
- Description: Developed an insurance portal to streamline the policy management process, enhancing customer-broker interactions in the insurance domain. The solution enabled customers to seamlessly opt for policies and interact through brokers for submissions, policy creation, and risk assessments.

Roles and Responsibilities

- Analysed the business requirements and developed appropriate Interfaces, Involved in Design of the Application Architecture and Sequence Diagrams as per the SRS.
- Developed Handlers (Validation, Transformation and Routing) for Interfaces and API Endpoints as per the requirement in Microservices
- Designed and implemented microservices following CQRS and Domain-Driven principles for modular and maintainable architecture.
- Implemented containerized deployments using Docker and Kubernetes on Azure, enabling seamless scalability and high availability.
- Implemented secure data persistence and file management by integrating .Net Core endpoints with Azure Blob Storage.
- Utilized Application Insights to monitor .Net Core API performance, trace request failures, and optimize application stability.
- Integrated Elasticsearch for advanced search capabilities and real-time data analytics.
- Optimized database interactions, enhanced the user interface, and ensuring seamless integration between frontend and backend components
- Developed and documented RESTful APIs in ASP.NET Core using Swagger for streamlined API integration.
- Integrated Kafka and SignalR for asynchronous communication and real-time event streaming.
- Designed and developed responsive Single Page Applications (SPA) using Angular14+, creating reusable components and directives for a modular architecture.
- Integrated Angular frontends with .Net Core Web APIs using RxJs Observables and HTTP Interceptors for efficient, asynchronous data handling.
- Involved in writing the Client side and Server-side validations
- Wrote Unit test cases and Integration test cases to ensured 100% test coverage with TDD to deliver robust and reliable solutions.
